Notes of the SPC-TC meeting held on June 21, 2022

The TC officers briefed the SPC members about the following:

1. IEEE Future Directions Committee Meeting
-The Future Directions on Digital Privacy Committee is having meetings once a month.
-The committee is led by Program Director, Future Directions Sin-Kuen Hawkins
-Current activities:
We are working on creating a diagram to show what it means when we use the term digital privacy.
However, it is not a definition. The idea is to create a "tree of life" or hierarchical "concept map" of what
we mean when we use the term Digital Privacy.
This map should be structured as a hierarchy. It should be as reasonably inclusive as possible. It won't be
exhaustive, but it should be logically self consistent so it is easy to understand where a component might
fit. Currently, we are discussing separating the diagram into tiers representing Information Management,
Ethics & Compliance, and Education & Implementation.
-We welcome any comments regarding digital privacy.

2. IEEE ICCE 2023
-The IEEE ICCE 2023 (https://icce.org/2023/Home.html) is opening submissions for regular tracks and
special sessions. The current submission deadline is by August 31.
-The conference is in conjunction with the Consumer Electronic Show (CES) 2023.
-ICCE 2023 is welcoming special session proposals, tutorial proposals and workshop proposals. More
details are available at the conference website. We encourage all members to submit to the conference.

3. Ongoing Special Issue on AI for CE in Transactions on CE

4. Webinars in collaboration with AES, SPS and CTSoc. Members were requested to invite potential
candidates for future webinars.
